

## Across The Ocean

### Our Last Night

Say goodbye to the storms in the night  
Say goodbye to this beautiful sight  
Because we pieced it all together when it just felt right

Every turn it took, we followed  
This compass led us to the land we call home  
After years of hope...  
I'm writing home to let them know we made it to the coast  
Just look at where we are  
The skies are clear and blue, I told you  
We saw what we wanted and we chased it all

We sailed across the ocean with a boat we built  
As we're navigating through the storms we pass along the way  
We saw what we wanted and we chased it all

Every turn it took, we followed  
We put our lives on the line  
Just look at where we are  
The fog has cleared and we can see the shore from miles away  
We sailed away.

We sailed across the ocean with a boat we built  
We sailed away with her, away with her

Part the seas  
We've been searching through our sleep  
Part the seas  
This land will bring us to our knees
