## Our Last Night

I'm coming home

The way those eyes look at me  
As I'm about to leave  
I hold you close  
Can't you see?  
That I just wanna stay with you  
I promise to write you letters  
And I'll be back soon  
Don't you worry, I won't let us fall apart  
(I won't let us fall apart)

No matter how far we find ourselves  
Our love will keep us close  
I want you to know  
You will never be alone  
I'm coming home, I'm coming home  
I want you to know I'm coming home

Everyday it gets harder and harder to breathe  
Why can't we make believe  
That we've got it all  
We were young  
We were free  
You're really all I need

I never found the right words to say  
Kept it all inside ignoring everyday  
I get lost trying to close the distance between us

But I will follow my heart back to you

No matter how far we find ourselves  
Our love will keep us close  
I want you to know  
You will never be alone  
I'm coming home, I'm coming home  
I want you to know I'm coming home

Take my hand just one more time  
It's safe to leave your doubts behind  
I will be with you through the lonely days and the lonely nights

(I will follow my heart back to you  
I will follow my heart back to you)

Take my hand just one more time  
It's safe to leave your doubts behind  
I will be with you through the lonely days and the lonely nights

Take my hand just one more time  
(take my hand just one more time)  
It's safe to leave your doubts behind  
(it's safe to leave your doubts behind)  
I will be with you through the lonely days and the lonely nights

No matter how far we find ourselves

Our love will keep us close  
I want you to know  
You will never be alone  
I'm coming home, I'm coming home  
I want you to know I'm coming home
