

## Liberate Me

## Our Last Night

You had no faith, you had no heart  
You wanted war right from the start

We were not the same  
You tried to find the demons inside of me  
But little did you know I had set them free  
We were not the same, you made me insane  
We were not the same

There were never any fingerprints to hide  
Because your death was a suicide  
There was no evidence to find  
Because it wasn't me who committed the crime

You took my voice, you took my pride  
But now you're gone so both are mine

We were not the same  
You made the wrong moves at the right times  
Was it fate or was it just in your mind?  
We were not the same, you made me insane  
We were not the same

There were never any fingerprints to hide  
Because your death was a suicide  
There was no evidence to find  
Because it wasn't me who committed the crime

Go!

You tried to lock me down!  
I found the key, liberate me!  
You tried to lock me down!  
I found the key!

I said, "You'll never take my freedom away"  
And those were the words that made us separate

(2x)

There were never any fingerprints to hide  
Because your death was a suicide  
There was no evidence to find  
Because it wasn't me who committed the crime
