

Necroshine

Overkill

You can take me out of my hell, you can't take the hell on out
of me
Watch me here as I get, but be careful what you see, oh yeah!

I cut across the waste, some live and some enshrined
I look into the light of the necroshine
Don't you worry 'bout me, you know I'm doin' fine
Basking in the light of the necroshine

In the name of all that's sacred, in the name of misery
Watch me here as I turn red and remember what you see, oh yeah!

I hunger for a taste to fill my glass with wine
Away from the right, into the necroshine
Don't you ever doubt me as you walk the line
Guided by the light of the necroshine

I think that I have been reborn just a little better than before
I think I tried to tell myself that I needed just a little more
They always tried to sell me, hang me what I couldn't use
Always tried to get a little better with an offer that I can't
refuse
You can take me full of fire, you can take me as you find
Or you can leave me here where you gonna see me guided by the necroshine...

Don't you worry 'bout me, you know I'm doin' fine
Basking in the light of the necroshine
Don't you ever doubt me as you walk the line
Guided by the light, guided by the light of the necroshine
