

Necroshine

Overkill

You can take me out of my hell, you can't take the hell on out
of me

Watch me here as I get, but be careful what you see, oh yeah!

I cut across the waste, some live and some enshrined

I look into the light of the necroshine

Don't you worry 'bout me, you know I'm doin' fine

Basking in the light of the necroshine

In the name of all that's sacred, in the name of misery

Watch me here as I turn red and remember what you see, oh yeah!

I hunger for a taste to fill my glass with wine

Away from the right, into the necroshine

Don't you ever doubt me as you walk the line

Guided by the light of the necroshine

I think that I have been reborn just a little better than before

I think I tried to tell myself that I needed just a little more

They always tried to sell me, hang me what I couldn't use

Always tried to get a little better with an offer that I can't
refuse

You can take me full of fire, you can take me as you find

Or you can leave me here where you gonna see me guided by the necroshine...

Don't you worry 'bout me, you know I'm doin' fine

Basking in the light of the necroshine

Don't you ever doubt me as you walk the line

Guided by the light, guided by the light of the necroshine
