

Never Say Never

Overkill

I climb the mountain for all to see
Systematic ascension is a part of me
I've felt the fire been taken over
I'm pushin' forward and getting closer

From the fire to the streets, I've seen it all
I've melted in the heat and I heard the call
And then a brand new day - a chance to be reborn.
I've seen another way; no time to sit and mourn.

There's a light that shines at the tunnel's end
It lights my every step; I came here to win
-- Never say never

Shadows of things that might have been
Or another sunset simply gone
Ponder questions without answers
Indecision spreads like cancer
Wash the dirt from beneath your nails
One has tried, one has never failed.!.

I'm getting closer, can see the top
And when I started, knew I'd never stop
The road was long and hard, the climb was rough
But to a greater end ya hang tough

Pulled it from inside of me, it drove me forever
Didn't want to sit and rot, wanted better
From the fire to the streets, from the fire to the streets
From the fire to the streets you never never, never say never!

There's a light that shines at the tunnel's end
It lights my every step; I came here to win
Never say never, never say never! No! Never!
