Our time has come, watch me set it off It's been a while but we back So you can count it loss

We lay and wait, don't hesitate
When opportunity knocks
Break the locks and rush the gates
Seize the day, we got moves to make
It's got to be now
Cause we're half past late

Say what you say, but you ain't shown me nothin If you want me to feel you Then you best to show me something All bark and no bite, talking all hype I hang with the illest You I don't recognize

Desensitize and paralyze Sabotage headquarters Flood your bloodlines, we sterilize

Here we come
Chant down dem Babylon
The wicked man when he sees me I go run
Me understand
Why dem cowards don't want none
Underground blaze the sound to Armageddon

RISE - Let your spirit fly RISE- Stand up for yourself RISE- Hold your head up high (2x)

Our time has come Set it off

Choose my battles, unravel your crew Dismantle, they still can't handle or fathom What I throw at 'em

I can't imagine, they babblin'
Acting like I'm laughing, don't find it funny
But I smile at your sarcasm

You plastic, so tragic, you fake So you mask it, no gimmicks, no antics We real and we've outlasted

Your phoniness, so you best to come correct You want to disrespect Why do cowards talk the loudest

Papa didn't raise no punk On everything I love, if you ready Then come and get it son Overpower the strong tower Infiltrate top ranks Count down the final hour

Here we come
Chant down dem Babylon
The wicked man when he sees me I go run

Me understand
Why dem cowards don't want none
Underground blaze the sound to Armageddon

RISE - Let your spirit fly RISE- Stand up for yourself RISE- Hold your head up high

We made it this far don't you quit on me

RISE - Let your spirit fly RISE- Stand up for yourself RISE- Hold your head up high
