## Here We Go

## Paddy and the Rats

Only the light goes on in front of the progress They cover the way out of their social madness Governing body has no human soul Poison white mind with several drugs no more!

Here we go, Against the law Here we go, Against the law

The panic on the street sips molotov coctail Underground movements shake up the subway For the pleasure of flesh light cannibal fires Take all the bricks ,
Coz yer wall must break down, no more !

Here we go, Against the law Here we go, Against the law Go On! We're gonna run to fall But no more! Here we go

Radio's a sound of the sublime terror
Primal warlocks handling of the media's error
Temples 're being built for the police state
Their control became today a physical pain, no more!
