

Sleeping With The Winter

Paddy and the Rats

I'm sleeping with the winter til' you come
Spend another day without the sun
Waiting for the ray of your eyes

Only you can tame my wild heart
If I rage it's heavy and hard
Only your words can calm me down

I need to hold you in my arms
For the last time in this life
I'm gonna scare away your harm
I want silence on this strife
Coz it was us against the world
But without your lovely words
It's like flying in the sky with no stars

Sleeping with winter all alone
Only your memories were blown
Here to me by the bitter breeze

Only you can tame my clouded mind
All my spite I left behind
For you to save my heart from freeze

I need to hold you in my arms
For the last time in this life
I'm gonna scare away your harm
I want silence on this strife
Coz it was us against the world
But without your lovely words
It's like flying in the sky with no stars

I need to hold you in my arms
For the last time in this life
I'm gonna scare away your harm
I want silence on this strife
Coz it was us against the world
But without your lovely words
It's like flying in the sky with no stars

I need to hold you in my arms
For the last time in this life
I'm gonna scare away your harm
I want silence on this strife
Coz it was us against the world
But without your lovely words
It's like flying in the sky with no stars
