

Walk Away in Silence

Pagan's Mind

Mystic ways of our time
On the path to paradise
And there are lines behind those lies
The inquisition
Charging with power to pretend
Share our vision to the end
To be seen in different lives
And to stay alive

Raise me up from stormy seas
A dark deception
Chasing winds, I see it clear
Save us, save us

Walk away in silence
Taking all the different stages
Walk away in silence
See the light in all their faces

Codes of warning, clarify
Accusation of belief
For it's more than meets the eye
The twilight section

Watching horizons come to an end
Spreading venom through the land
The invasion of our kind
Time to say goodbye

Lifting visions of my dream
Time to be revealed
Stronger now as we believe
Save us, save us

Walk away in silence
Taking all the different stages
Walk away in silence
See the light in all their faces

Seems like it's real, but it's not so we ride this dream
Save us from falling down

Walk away in silence
Taking all the different stages
Walk away in silence
See the light in all their faces
