## Walk Away in Silence

**Pagan's Mind** 

Mystic ways of our time On the path to paradise And there are lines behind those lies The inquisition Charging with power to pretend Share our vision to the end To be seen in different lives And to stay alive

Raise me up from stormy seas A dark deception Chasing winds, I see it clear Save us, save us

Walk away in silence Taking all the different stages Walk away in silence See the light in all their faces

Codes of warning, clarify Accusation of belief For it's more than meets the eye The twilight section

Watching horizons come to an end Spreading venom through the land The invasion of our kind Time to say goodbye

Lifting visions of my dream Time to be revealed Stronger now as we believe Save us, save us

Walk away in silence Taking all the different stages Walk away in silence See the light in all their faces

Seems like it's real, but it's not so we ride this dream Save us from falling down

Walk away in silence Taking all the different stages Walk away in silence See the light in all their faces
