Fall On Evil Days

Pain Confessor

Do we remember why they're suffering None of this seems real We see their sadness, it's all madness Darkness has descended upon us

All the nameless fears have come true Faceless secrets revealed All this loathing that we feel inside It doesn't justify our deeds

Dead emotions all around us Time of sickness begins Never believed in tomorrow since day one We were walking dead

All the nameless fears have come true Faceless secrets revealed All this loathing that we feel inside It doesn't justify our deeds

Fall on evil days, remember there's no way out What is done is done
Fall on evil days when agony breaks us down
We murdered love

Pathetic lives, too sick to cure There is no medication Fall on evil days, we are walking evil ways Hand in hand towards hell

Fall on evil days, remember there's no way out What is done is done
Fall on evil days when agony breaks us down
We murdered love
