

# Fragile Bones

Palisades

Under your scope  
So you can see close  
Analyze the way that my colors take fold  
You pin my wings down  
So you can find out  
How long it'll take til I fall to the open ground

I drag around all the weight of your words  
Shutting me down so your voice can be heard  
Make me your clone  
Make me your own

You think you're curing a disease  
You got the answers, the vaccines  
You're making me hate me  
Making me hate me  
Pull at the strings to play your scene  
But I cut the ties from underneath  
You'll never save me  
You'll never save me

Cause I wanna know  
And do you reap what you sew  
And do you dull whatever seems to have a pulse  
You try and fix me  
To fit your machine  
But what's alive can never live without a soul

I drag around all the weight of your words  
Shutting me down so your voice can be heard  
Make me your clone  
Make me your own

You think you're curing a disease  
You got the answers, the vaccines  
You're making me hate me  
Making me hate me  
Pull at the strings to play your scene  
But I cut the ties from underneath  
You'll never save me  
You'll never save me

Try to be the one that you want and it just wasn't enough  
You took all my pride and turned it to dust  
You take my fragile bones and you make them your own  
You wanted everything til nothing's left of me

You think you're curing a disease  
You got the answers, the vaccines  
You're making me hate me  
Making me hate me  
Pull at the strings to play your scene  
But I cut the ties from underneath  
You'll never save me  
You'll never save me
