

Into the Light

Papa Roach

This is a warning my final warning

Got a head full of wreckage and a mouthful of lies
Got a mind in the gutter I feel like I want to die
I'm the king of nothing with a broken crown
I've been taking a beatin' but I wont back down

Free me from myself shut down my mind
A solo revolution into the light

This fear is a weakness and its wearing me out
I burn in the sickness I feel like I'm goin' down
I deny my affliction and run from the light
It's a lonely condition if you are the one denied

Free me from myself shut down my mind
A solo revolution into the light
Fuck all this madness put it aside
Out of the shadows and into the light
Free me from myself shut down my mind

Out of the shadows and into the light

Free me from myself shut down my mind
A solo revolution into the light
Fuck all this madness put it aside
Out of the shadows and into the light
Free me from myself shut down my mind

Shut down my mind
Free me from myself
