

# You and I

## Paper Route

I waited for you  
I'm a photograph on your floor  
That you found in your bedroom  
Now you wish you could ignore  
All my desperate words fall  
I am the sound of a dead language I know  
I waited for you  
I'm everything you were before

I'm shooting arrows and I wear your pin  
But there's nothing left here to believe in

So run for your life now  
Maybe you won't you wanna stay here  
And live underground  
We gotta get out  
While the going is good  
We gotta turn out the lights  
We gotta run for the words

You and I  
We live awake at night

I've waited for this  
I'm the letter you never sent  
I'm just a shot at forgiveness  
All the words now taken back  
In every way I need you  
Pull me through every memory you thread  
I've waited for this  
It's ever wound I won't forget

You made your move and now it's mine again  
Can I give you something to believe in?

So run for your life now  
Maybe you won't you wanna stay here  
And live underground  
We gotta get out  
While the going is good  
We gotta turn out the lights  
We gotta run for the words

You and I  
We live awake at night

Run away run away but don't go  
Till you've heard every word I've said  
Run away run away but just know  
I will be two steps ahead

You and I
