

# This Life

Parabelle

Lay back down  
And you'll be mine

Attention's drawn  
What matters is the past  
Because it still shows you're standing on  
These pins and needles  
You're on the shelf  
You can't seem to save yourself

I bleed for you enough  
I bleed for your touch

Now just walk away  
And I'll believe the wait is over  
But this time you  
You think you can settle the score  
But just be careful what you wish for

We tried for days  
Made the same mistakes as always  
You're off the shelf  
You can't seem to stop yourself  
Your hands are dirty liars  
But they held some other kind of life

(This life, this life can hurt) I bleed for you enough  
(This life, this life can hurt) I bleed from your touch

Now just walk away  
And I'll believe the wait is over  
But this time you  
You think you can settle the score  
But just be careful what you wish for

This life  
This life can hurt

This life  
This life can hurt

Now you're mine

'Cause you think you can settle the score  
Your hands are dirty liars

Now just walk away  
And I'll believe the wait is over  
But this time you  
You think you can settle the score  
But just be careful what you wish for

I bleed from your touch  
But I bleed for you enough

This life  
This life can hurt

This life
