

Us (Walk Away)

Parabelle

I wanna say, I'll always be your fool
Cuz everything you are is frankly beautiful
You always said you would refuse to bear all the bad news
It lets you stay strong and wait for me to paint myself out of
your scenery
So you won't notice me

Did I cause you to change? We never walk away
Can I bother you to stay and never walk away?

They're writing tales of how we touched
Is that the same reflection that he got
And I will break us down to a little bit of reason
And a whole lot more, passive tidal waves
There's a pond that we wait across and you're still skipping st
one
But I will wait till you walk around, you never fought for me

Did I cause you to change? We never walk away
Can I bother you to stay and never walk away?

We kill them all, white knuckle failure
We kill them all and I what I want is dead and shaded in from a
ll the side lines

I know you and you know me, we both know how
But don't know why we know the words
We both know how to hurt

Did I cause you to change? We never walk away
Can I bother you to stay and never walk away?

Or we could just kill them all, slight second chances
We kill them all, how about now for us?
