

# Beyond The Void

Paragon

Toxic wastes pollute our seas  
Despair fills our skies  
Bitter lost devoid of hope  
We watch our planet die

Many years of vile abuse  
Profit at all, cost  
Nothing here to keep us back  
The battle's gone and lost

Beyond the void  
Point of no return

Gathered strength we build a  
Ship in space we place our faith  
Searching for a better world  
A new and peaceful place  
Secret chambers  
Underground, the site of our construction  
The ship is slowly taking  
Shape, above immense  
Destruction

Take off day has now arrived  
The odyssey now begins  
Forget about our bitter past  
Forget about our sins  
On we drift our through the  
Stars, lost in outer space  
Searching for the perfect  
World, to found the perfect race

Beyond the void  
Point of no return
