

Meanwhile, in Utopia
Congratulations that we've come so far
It's a pleasure to meet you finally!
You have guided our very destiny

Flying back from Jupiter
Through the portal, we can see the stars
A precious memory, of what we used to be
Now Europa is so far away

Times passes by, and it's beautiful
Don't be afraid, this was made for you

Europa , we need you, we need you
Europa , we need you, we need you

Manipulation, is our master plan
Your genetics we rearrange by hand
Atomic structure it's so simple
To recreate you, like we always do

You are our children, we did what's best for you
We gave you pleasure, we gave you lots to do
Now look around you, time is running out
Are we dreaming, it's so hard to say?
