

Underground

Parralox

We travel the night
To listen to all the things you fear
We go bump in the night
Can you feel the black inside of me

So we arrive, dream over night
On a silent distant light
If we perceive and you believe
Then we stay hidden in the night

In the day light
We feel all right
Till the sundown
Then we dig 10 feet underground

Like angels in flight
We travel the night in search of you
We know what you feel
Of course we know how to make it real

Day light, all right, sundown, 10 feet underground

It feels paradise
Yeah, when we get it right
