

# Underground

Parralox

We travel the night  
To listen to all the things you fear  
We go bump in the night  
Can you feel the black inside of me

So we arrive, dream over night  
On a silent distant light  
If we perceive and you believe  
Then we stay hidden in the night

In the day light  
We feel all right  
Till the sundown  
Then we dig 10 feet underground

Like angels in flight  
We travel the night in search of you  
We know what you feel  
Of course we know how to make it real

Day light, all right, sundown, 10 feet underground

It feels paradise  
Yeah, when we get it right
