

We Believe In Electric Love

Parralox

Nobody can understand me like you do
Maybe if I hold you I can become you
Engineered for love, in all the right places
Knowing that the force of love may replace us

But there is a place
Made just for the human race
Where our love can grow
Electrical is the way to go!

We believe in Electric Love
Free for me, for you, and for all of us

I stand beyond the Mount of Olympus
Feeling the grains of sand shift beneath us
I create a crystal palace from nothing
I forget that oxygen is for breathing
