Ain't nobody gonna leave this place alive We never should have come here alone I can hear them screaming we're a long, long way from home It's a shame but I believe they're not gonna let us leave And we'll never make it out on our own We wrote our names in stone And tonight's too late We're gonna move til we die on this dance floor baby Let it out, ain't nobody gonna leave this place alive We're gonna move til we die on this dance floor baby Let it out, ain't nobody gonna leave this place alive We don't care bout the world out there We've made this bed, We've become the living dead We're gonna move til we die on this dance floor baby Let it out, ain't nobody gonna leave this place alive Baby I don't think it's a show I don't understand the power but we've only got an hour to go A fall to circumstance Yeah we never had a chance But I guess that this is just how it goes We wrote our names in stone And tonight's too late We're gonna move til we die on this dance floor baby Let it out, ain't nobody gonna leave this place alive We're gonna move til we die on this dance floor baby Let it out, ain't nobody gonna leave this place alive We don't care bout the world out there We've made this bed, We've become the living dead We're gonna move til we die on this dance floor baby Let it out, ain't nobody gonna leave this place alive The door is locked The floor is spinning We can't run, we're done There's no beginning And the dancing dead are taking over now We're never gonna make it out We're gonna move til we die on this dance floor baby Let it out, ain't nobody gonna leave this place alive We're gonna move til we die on this dance floor baby Let it out, ain't nobody gonna leave this place alive We don't care bout the world out there We've made this bed, We've become the living dead We're gonna move til we die on this dance floor baby

Let it out, ain't nobody gonna leave this place alive
