

Therefore I Party

Patent Pending

We build this city on rock and roll
With the kids who wont quit we cant cause its in our soul
Take a minute for the critics apart me
We don't care at all we just came here to party
And if I die today
I'm going out with my friends love
I'll say what I have to say
And let this world come to an end
It's been twenty four years but I figured it out
It's just another six months till I'm laughing it back
If we dream, we can do
Take the streets, me and you
And the desire till behind us we will
The sky comes falling
You could hear me calling
Party down
This day is the best that we ever had
Each day is the best that we ever
Please stay awhile
Well go out in style
Party Down
Lets stop the beat
Cause its in my soul
Dig deep from deep
Just lose control
I lost you once before
But now I'm back on track again
I know there good left in this world
I'll find it all before it ends
Theirs been blood and theirs been tears
But there was never a doubt
I pull my heart I pull my soul
And now we figured it out
If we dream, we can do
Take the streets me and you
And the desire till behind us we will
The sky comes falling
You could hear me calling
Party down
This day is the best that we ever had
Each day is the best that we ever
Please stay awhile
Well go out in style
Party Down
Lets stop the beat
Cause its in my soul
Dig deep from deep
Just lose control
We lost it all
We lost it all
We lost it all
We lost it all
