

This Love Can Save Us All

Patent Pending

Lesson learned
we returned
burned, scared, and alone.
(exactly how they said it would be)
state your case
keep the pace
face down in the mess
we made back home
we can give more than this
though it kills me
and I'm sorry for the people
that we all used to be
we can give more than
just believe
if we smile
just a little more
get angry
after all we've been fighting for
then I don't believe that
we can ignore
this love can save us all
this love can save us all
coming to
pulling through
who's living the good life?
(I'm exactly where I needed to be)
driving back
losing track
pack only what's needed to survive
and now finally we say
we believe that we smile
'cause we didn't fade
can you believe that we are so helpless?
this love can save us all.
