

Upcoming vengeance is my nemesis
Time stopped by chronokinesis
The space in stillness is the slave of my will
Fifth Element increased all my psycho skills

The line of foe is stopped and motionless
The vortex of abyss is the battlefield
My mind's screams are fortified by metal
But only the waves of sadness
Always makes me weak

Dragonlords screams for Metal
Dragonlords are calling for Metal
The Black Lord knows our Achilles heel
Reject the sadness! Pessimism kills

The left flank screams for Metal
The right flank is calling for Metal
A millionth army of soul thirsty demons
Again is stopped in time

In silence surrounded by death and life
The battle has stopped in space and time
But our swords dance fast in chase of demon's hearts
The dragon's blast blown down the evil's crown

Once again let's stop wheels of time
To get closer to victory
Energy grows inside our minds. Shaped by our will
Time slows down and we keep the fight
On this fallen astral plane
Energy exploded stopping all around, killing everyone

The time has stopped for death and life

Our astral dragons spit fireballs
Metal unites my thoughts with their thoughts
Demons die turned into demonic dust
By our swords and the dragons blast

The Black Lord sends tragic visions from the past
He tried to disturb the order of my mind
I know one day we'll have to move this war
From this fallen dimension to the realtime world

But our swords dance fast in chase of demon's hearts
The dragon's blast blown down the evil's crown

Once again let's stop wheels of time
To get closer to victory
Energy grows inside our minds. Shaped by our will
Time slows down and we keep the fight
On this fallen astral plane
Energy exploded, stopping all around, killing everyone.
