

# Defiled Autopsy Remnants

## Pathology

Bodies starts to rot.  
The atrocity of being demolished exhumes you  
organs  
manifested for scientific worship  
veins drain the life from a worthless  
shell  
Maggots feaster threw flesh  
Remnants of an evil night, pale necrotic  
skin  
within this autopsy all will be revealed  
unburied from the grave...  
As  
i remove the flesh, i taste the decay of the wounds  
and feed off the  
emptiness, buried in your spinal wretch  
Bodies starts to rot  
incisions so  
prices, injecting viruses  
Chunks of brain and skull fragments  
Agony of a  
peerless dementia  
crapped filled piece of human shit  
beaten to a  
unrecognizable form  
how the fuck can the cause of death be determined  
putrid  
autopsy of the dying race  
The curse of being created exhumes you  
organs eaten  
fro cannibalistic worship  
and instruments of removing the blood  
veins drain  
the sin from a worthless shell  
Blistering stare into the eyes the body starts  
to rot  
of this formless being  
devouring what is left from this  
massacre  
maggots fester threw flesh  
witness of an evil night  
with a perverse  
morality to rape and kill  
Deadening eyes stare at this scalpel  
putting to  
rest this defiled autopsy
