Mountain of the Dead

Pathology

Descending upon the Ics as winter arrives In Darkness
They cut from the inside to escape
The Night

Skin changed to the dark Clothes filled with radiation Orange lights from the sky Fall from north

Mount of the dead Fall from north

Hypothermia
Fractured skulls
Hypothermia
And tongue removed

Disorientated from heat loss Death has come from above As we lye in the north Ready to see the other side Frozen with fear our lives Lost and covered From this side to the other
