

## Blue Overtones

Patrice

I can tell you wanna get down with me  
Although I don't understand a word you speak  
But you're sending out your energy  
You know I'm feeling you  
Same way you're feeling me  
I say hush baby don't you speak  
I can read your mind, know what you seek  
You seek that touch that makes you weak,  
That makes you forget about  
What your mama told you,  
You want those arms to hold you  
And give you that;

Love making, slow dancing, romancing  
In the middle of the night  
It is that;

Intergalactic tongue  
Make' him come, make' her come  
It is that language beyond words we speak  
All night long, all night long

Every answer leads to another question  
Only truth is spoken, ancestors have been woken  
No estimations and no suggestions  
Only matters of facts backed up by act- act-actions  
And reactions, physical attraction, soul interaction  
That make me forget 'bout myself  
And I feel free ohohona yes I feel free  
Ohohona yes I feel free...
