

Superglue

Patrick Nuo

you can tell without sayin' a word
it's written all over your face
somethin' in you brought out somethin' in me
and fiiled the empty space
we lean against the wind together
and watch the world disappear
and there ain't nobody who could
ever change it
never in a million years

under the influence of love we ride
from the dawn into the endless night

we stick together like superglue
we stick together like
we stick together like
we stick together like superglue
we stick together like
we stick together like

we carry each other - just the two of us
with an endless guarantee
my everyday beautiful wake up call
nothing's ever felt so right to me

wherever we may go - we go together
we're breakin' the rules but we stay together
like superglue
