

# Superglue

Patrick Nuo

you can tell without sayin' a word  
it's written all over your face  
somethin' in you brought out somethin' in me  
and fiiled the empty space  
we lean against the wind together  
and watch the world disappear  
and there ain't nobody who could  
ever change it  
never in a million years

under the influence of love we ride  
from the dawn into the endless night

we stick together like superglue  
we stick together like  
we stick together like  
we stick together like superglue  
we stick together like  
we stick together like

we carry each other - just the two of us  
with an endless guarantee  
my everyday beautiful wake up call  
nothing's ever felt so right to me

wherever we may go - we go together  
we're breakin' the rules but we stay together  
like superglue
