

## Flame

Patti LaBelle

Ooh, find me  
You can always find me  
Loving you so kindly  
Your life is like candlelight

And darlin' no one told us  
No one ever told us  
What this love could hold for us?  
Maybe we were meant to find it faithfully

There is always a sun that's rising  
When I know in your heart you're there for me  
And from now on your flame just keeps me  
Burnin' on

Know you no one knows like I do  
There's one thing I'm sure is true  
That we were meant to  
Share our whole lives through

There is always a sun that's rising  
When I know in your heart you're there for me  
And from now on your flame just keeps me  
Burnin' on

There is always a star that's shining  
Whether you're far away or near to me  
And from now on your flame just keeps me  
Burnin' on

There is always a sun that's rising  
When I know in your heart you're there for me  
And from now on your flame just keeps me  
Burnin' on, burnin' on

There is always a star that's shining  
Whether you're far away or near to me  
And from now on your flame just keeps me  
Oh, it's gonna keep burnin' on

And from now on your flame just keeps me  
Burnin' on  
Oh know you no one knows like I do
