

Nothing Could Be Better

Patti LaBelle

[Incomprehensible] to places near and far
Working for a living sometimes the road gets hard
With the first snowflakes of winter
My heart goes straight back home
To the days when I was little before life on my own

Nothing could be better than the Christmas here with you
Family joined together, loved ones old and new
As we gather here, the season's cheer
Makes my yuletide wish come true
Nothing could be better than Christmas here with you

Christmas Eve is special, it's music to my ears
Singing 'round the fire, we chose the coming year
Carols in the distance, faces full of joy
It's a Merry Christmas, in wonder we rejoice

Nothing could be better than the Christmas here with you
Family joined together, loved ones old and new
As we gather here, the season's cheer
Makes my yuletide wish come true
Nothing could be better than Christmas here with you

As I gaze at the Christmas tree
The light shining back at me
Makes me glad for the times we spent
So I'm myself being thankful for these moments
Moments in our life

Nothing could be better than the Christmas here with you
Family joined together, loved ones old and new
As we gather here, the season's cheer
Makes my yuletide wish come true
Nothing could be better than Christmas here with you
