

Way Up There

Patti LaBelle

Way up there, where peace remains,
Where silent thunders and angels sing.
Imagination and amazing grace,
Bring us closer to our home in space.

The stars are gathered and illuminate,
To lead us safely through heavens gate.
We look behind us at the wonder of the earth,
Only to remind us where God came from.

Way up there, where peace remains,
Where silent thunders and angels sing.
Imagination and amazing grace,
Bring us closer to our home in space.

Like a shooting star, through endless time.
We say a prayer for all mankind
If we could only see through that tiny window,
We could be reborn and we all would know that way up there

Way up there, where peace remains,
Where silent thunders and angels sing.
Imagination and amazing grace,
Bring us closer to our home in space.

We are all, we are one
Created with the sun, moon and stars
Every woman, every child and man
Will one day take each others hand.

Way up there, where peace remains,
Where silent thunders and angels sing.
Imagination and amazing grace,
Bring us closer to our home in space.
