Let Me Get To Know You

Let me get to know you Help me make it last Love me spare the moment Good things go so fast

Let me kiss you slowly There, upon your mouth Let me get to know you North, east, west and south

Love, love, love We found love Together In each other We found love

Loving you comes easy With someone like you Skin to skin you please me I hope I please you, too

Let me build you rainbows Keep you from the rain Fill your world with sunshine Time and time again

Love, love, love We found love Together In each other We found love

Love, love, love We found love Together In each other We found love Paul Anka
