Hope

Paul Brandt

I can't believe, you found me here You saved me in the nick of time Just when I thought nobody cared You reached out and with your hand, took mine You know just how to pull me through That's what I love about you

You give me hope And I can face another day All it takes is love and faith And the courage to believe You give me hope And there's nothing I can't do I get all my strength from you Saying you will stand by me You give me hope

It might be dark, and I might be scared But what ever this life brings Knowing that you will always be there I can take on anything If you're beside me in this fight I know I'll make it through the night

Cause you give me hope And I can face another day All it takes is love and faith And the courage to believe You give me hope And there's nothing I can't do I get all my strength from you Saying you will stand by me You give me hope

If you're beside me in this fight I know I'll make it through the night

Cause you give me hope And I can face another day All it takes is love and faith And the courage to believe You give me hope And there's nothing I can't do I get all my strength from you Saying you will stand by me You give me hope
