## If This Isn't Love

If this isn't love What else could it be What's happened to you What's happening to me If this isn't love What else is so strong Or feels half as good Or last's half as long

Now I am not an expert On matters such as this Romance has always left me in the dark But with each brush of your sweet touch And every lingering kiss I think that Cupid's finally found his mark

Could it be a bug Or maybe the flu That's going around You say that you've got it too

If this isn't love What else could it be If this isn't love Then it's alright with me

If this isn't love Then it's alright with me Paul Brandt
