

# We Are The One

Paul Brandt

Unaware angel falling into sleep  
I never quite believed that I'd get in this deep  
I don't have a doubt  
We are the one  
Oh I love to watch you as the day begins  
Sun comes through the window  
Starts to kiss your skin  
Chase the shadows out  
We are the one

We're the story told since time began  
We're what heaven holds inside her hand  
We're the one thing I never knew I needed  
But you completed me and  
We are the one

I want to be with you as the years go by  
I know I won't be perfect, but for you I'll try  
That's what love's about  
We are the one

We're the story told since time began  
We're what heaven holds inside her hand  
We're the one thing I never knew I needed  
But you completed me and  
We are the one thing I never knew I needed  
But you completed me and  
We are the one
