

# What's Come Over You

Paul Brandt

Something's missing, something's wrong  
Something's not right where it belongs  
Why am I doubting what I thought I knew  
What's come over you

Where's the laughter where's that touch  
That made me feel you were in love  
I pray it's just a phase you're going through  
What's come over you

I can roll with the tide, come in from the rain  
Turn my back to the wind, stand my share of pain  
But if you don't love me there's nothing I can do  
What's come over you

All these memories of all those times  
Make it so hard to say goodbye  
To all those dreams we shared that won't come true  
What's come over you

I can roll with the tide, come in from the rain  
Turn my back to the wind, stand my share of pain  
But if you don't love me there's nothing I can do  
What's come over you
