

# California

Paul Kelly

California - I can taste you even now  
California - I'll get back to you somehow  
I still see you in my dreams  
I hear your name on every tongue  
It's been so long

California - You whispered to me all last night  
California - With your beauty like a knife  
I can hear your siren song  
Calling me back to your shore  
To die once more, California

California - I took my story to the well  
California - You're still eating at my soul  
How I miss your greedy eyes  
Our golden days, our purple nights

I'll pay the price, oooh California
