

We've Started a Fire

Paul Kelly

Morning is rising
Suddenly I open my eyes
Sun don't catch me
Lying here by your side
We're like two children playing with matches
Hidden from the world

We've started a fire
We've started a fire
We've started a fire
We can't put out

Kiss me, then let me go before the sun is high
Once kiss-one spark!
Danger when the powder is dry
We're just two children playing with matches
Hidden from the world

We've started a fire
We've started a fire
We've started a fire
We can't put out

Morning is rising
Lying here by your side
Daylight comes shining, burning right into my eyes
We're just like children playing with matches
Hidden from the world

We've started a fire
We've started a fire
We've started a fire
We can't put out
