## **Take Another Run**

## **Paul Overstreet**

We started out to walk through life hand in hand together We ran into some trouble on the highway to forever Took a turn that turned out wrong, woke to find the feeling gon e But I know that we'll recover, if we hold on to each other

Let's take another run at it, baby Take another run at our love Let's have a little fun with it, darlin' It don't have to be so serious Don't tell me that it's over We can pick the pieces up Let's take another run Take another run at our love

Sometimes the mountain looks so high When you're standing at the bottom But once we've made it to the top You can't see the problem Right now it hurts a little bit But we've never been the kind to quit And I'll know we'll make it over We'll be rollin' in the clover

If we walk away and say we tried We'll never know what's on the other side
