## **The Other Side**

When this broken through I will comfort you When I wake my tongue is tied Daylight brings the great divide

Weeping like the rain Whispering your name Long to be reunified Believe the sun will rise When I reach the light I will see you on the other side

I'm sure the sun will shine When I reach the light I will see you on the other side

See you on the other side When I close my eyes See you on the other side When I close my eyes

See you on the other side When I close my eyes See you on the other side When I close my eyes

Speeding City lights Leave me weak tonight Oh I miss your warmth inside Stars came out to shine Across the waterline I can feel you on the other side

See you on the other side When I close my eyes and I reach the light See you on the other side When I close my eyes

See you on the other side When I close my eyes and I reach the light

See you on the other side When I closed my eyes Paul van Dyk
