

Now the Night Is Here

Paul Weller

Let's you and I blow gently on
The embers of today
Now the night is here to tell us
To be in love

Let us not talk harshly now
Our time is to reconcile
Now the night is here to tell us
To be in love oh, to be in love

Now the night softly says
That the world is here to stay
Falling out of misty dreams
We arrive so swift it seems to be

No velvet dress can compare
To your beauty face so fair
And your grace shall carry you through
To a better place and I shall follow you
I shall follow you to be in love

Let's cast the wind that brought us here
'Til we know not when
Now the night is here to tell us
To be in love
Oh, to be in love
Oh, to be in love
To be in love
