

You've Had It With You

Paul Westerberg

I had it with the friend who uses me
To open doors like I was a skeleton key

I had it with everyone, had it with anyone I ever knew
You've had it with you
You need someone to fall in love, need someone to fall in love
Any anyone will do
You've had it with you

Like Catherine the Great underneath a big horse
Your sexual preference is me of course
I get away with murder and I promise not to hurt her
If I have to shoot

Had it with you
Had it with your shoes..
Had it with you baby and your star-cheap car
I'm fading faster than a UK pop star
I've had it with everyone, everyone I ever knew well I do

[You had it with your neighbors, had it with your clothes
You had it with your records, ???
You had it with your friend, had it with your shoes,
You had it, goddammit! You've had it with you!
And you've had it with me too...
