

Grazing In The Grass

Paul Young

Sure these melodies are in the grass
Wanna trip just watching as the world goes by
They're so many good places to see while
We're grazing in the grass
Colours bright colours bright making everything out of
The sight in the grass
Sun beaming down between the leaves
And the birds darling in and out of the trees
Everything here is so clear you can see it
Everything here is so real you can feel it
And it's real so real so real
Can you dig it
Let's dig it
Can you dig it
In the grass
It's so real
In the grass it's a gas
Sun beaming down between the leaves
And the birds darling in and out of the trees
Everything here is so clear you can see it
Everything here is so real you can feel it
And it's real so real so real
Can you dig it
Let's dig it
Can you dig it
In the grass
It's so real
