

# Now I Know What Made Otis Blue

Paul Young

You got a hold on me  
Hey don't you know  
We've gone too far for me to let you go  
You throw my love away  
And then you try  
To see it burning in a stranger's eyes

I remember the good times  
I remember the things we used to do

Now I know what made Otis blue  
Girl it must be love that we're going through  
Now I know what made Otis blue  
Every single night I keep wanting you

Don't make me sleep alone  
Don't make me bleed  
How can you waste your love in jealousy  
If we're together baby  
Your eyes will see  
There is no other lover here than me

You remember the good times  
Do you remember when every word was true

There is no one else  
Only you  
I'm begging you  
Don't turn your heart to heartless
