

Not By My Side

Pavlov's Dog

She would leave you standing in some doorway
She would leave you standing under fire

In a different space and time
Where it's bare bones black and white
All your friends keep asking why
You're not by my side

She would leave you standing there sweating
She would leave you hanging out to dry

Never had a girl like you
..... a thousand
All your friends keep asking why
You're not by my side

She would leave you standing there blinking
She would leave you hanging out to dry

In a different space and time
Become different every time
All your friends keep asking why
You're not by my side
You're not by my side
Not by my side
Not by my side
Not by my side
