## The End

What were all those dreams we shared Those many years ago? What were all those plans we made now Left beside the road? Behind us in the road

More than friends, I always pledged Cause friends they come and go People change, as does everything I wanted to grow old I just want to grow old

Slide up next to me I'm just a human being I will take the blame But just the same This is not me

You see? Believe

I'm better than this Don't leave me so cold I'm buried beneath the stones I just want to hold on I know I'm worth your love

Enough I don't think There's such a thing

It's my fault now Having caught a sickness in my bones How it pains to leave you here With the kids on your own Just don't let me go

Help me see myself Cause I can no longer tell Looking out from the inside Of the bottom of a well

It's hell I yell

But no one hears before I disappear Whisper in my ear Give me something to echo In my unknown future's ear

My dear The end Comes near I'm here But not much longer.
