

Different

Pendulum

We see the shadows that are falling from your eyes
Draining your face of everything but the disguise

Don't hide baby
Let them see your true colors
Don't mind the camera
Let them see your black heart tonight

Don't hide baby
Show them just how deep it goes
Don't mind the cameras
Let them see your black heart, baby

You've been perfect from the start
They told me that time has only done you wrong

We are going to a different place, we take in everything we can
There's no expression left upon our face
'Cause time is running out so fast
It's sinking in the sand

You've been talking from the heart
Saying that I can't feel your way from earth

We are going to a different place, we take in everything we can
There's no expression left upon our face
'Cause time is running out so fast
It's sinking in the sand

Sinking in the sand
Sinking in the sand
